| <b>Project Title</b>                   | <b>Exploring Trail-Based Selection/Pointing Techniques</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Purpose of the Study</b>            | This research is being conducted by George Morales at Emory University. The purpose of this project is to investigate user interactions with trail-based selection techniques in a web-based environment. By studying how participants engage with these methods compared to traditional point-and-click approaches, to improve their design, usability, and efficiency in real-world applications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Procedures</b>                      | <ul style="list-style-type: none"><li>• You will begin with a <b>training phase</b> to familiarize yourself with the selection technique and practice the mechanics before starting the actual tasks.</li><li>• You will then proceed to the <b>testing phase</b>, where you will complete a series of target selection tasks using the <b>crossing-based selection method</b>, aiming for accuracy and efficiency.</li><li>• Data collected from the <b>testing phase</b> will include <b>selection accuracy, time taken, deselections, and error rates</b>.</li><li>• After all trials, a <b>summary of your results</b> will be displayed, and you will have the option to <b>download your trial data for reference</b>. The total study duration will be around <b>5 to 10 minutes</b>.</li><li>• <b>You may choose to withdraw from the study at any time.</b></li></ul> |
| <b>Potential Risks and Discomforts</b> | There may be some risks associated with participating in this research study related to usability challenges. For example, you may experience frustration, confusion, or fatigue while interacting with the dashboard, widgets, graphs, carousel, or other interface elements. No other risks are foreseen.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Potential Benefits</b>              | There are no direct benefits to participants.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Compensation</b>                    | There is no compensation for participating in this study. Your participation is entirely voluntary, and you may withdraw at any time without penalty.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Confidentiality</b>                 | The research team will treat all data collected from this study with confidentiality. All data will be de-identified. Paper records will be stored in a locked office, while electronic data, including screen recordings and screenshots, will be stored on a password-protected computer system. If we publish a report or article about this research, your identity will be protected to the maximum extent possible. Once the research is completed, all data will be fully anonymized. Your information may be shared with representatives of Emory University or governmental authorities if you or someone else is in danger or if required by law.                                                                                                                                                                                                                    |

**Right to Withdraw  
and Questions**

Your participation in this research is completely voluntary. You may choose not to take part at all. If you decide to participate in this research, you may stop participating at any time. If you decide not to participate in this study or if you stop participating at any time, you will not be penalized or lose any benefits to which you otherwise qualify.

If you are an employee or student, your employment status or academic standing at [redacted] will not be affected by your participation or non-participation in this study.

If you have questions, concerns, or complaints, or if you need to report an injury related to the research, please contact the investigator:

**George Morales**  
**gpmoral@emory.edu, 345-567-910**

---

**Participant Rights**

If you have questions about your rights as a research participant or wish to report a research-related injury, please contact:

**Emory University**  
**Institutional Review Board Office**

This research has been reviewed according to IRB procedures for research involving human subjects.

---

**Statement of Consent** Your signature indicates that you are at least 18 years of age; you have read this form of consent or have had it read to you; your questions have been answered to your satisfaction, and you voluntarily agree to participate in this research study.
